

Mobile app security you can trust

Fight real malware

Safeguard your app and/or SDK against abuse of accessibility services, screen readers, keyloggers, fake phishing windows, and more.

Protect your intellectual property

Ensure that your app and/or SDK code remains obfuscated from unauthorized access, imitation, or reverse engineering attempts.

Safeguard sensitive information

Store app secrets—like session tokens, personally identifiable information, API keys, and more—both statically and dynamically.

Reduce time to market

Secure and distribute your apps and SDKs with ease and within minutes using Promon's integration tool.

Product overview

Promon solutions require minimal security knowledge. We take care of the complexities of app security so you can dramatically accelerate your app's time-to-market and integrate smoothly with your development team's favorite CI/CD tools.

Promon SHIELD®

Protect your apps at rest and at runtime
